QA & Automation Team Lead | Hands-on Quality Engineering

Hands-on QA and Automation Lead with extensive experience designing, building, and maintaining automation frameworks and test infrastructures across UI, API, Integration, and E2E layers. Strong coding background with practical experience in CI/CD, cloud environments, and Agentic AI testing, combining technical leadership with day-to-day engineering and delivery.

Professional Experience

QA & Automation Team Lead | YouCC (GoTech)

2022 – 2026

- Hands-on design, development, and maintenance of automation frameworks and test infrastructure
- Built and implemented scalable automation solutions across UI, API, Integration, and E2E testing
- Developed automation from scratch and integrated tests into CI/CD pipelines with Quality Gates
- Drove the transition from manual testing to automation while actively contributing code and technical solutions
- Led engineers through technical guidance, code reviews, mentoring, and hands-on problem solving
- Hands-on testing and automation for Agentic AI solutions, including AI-driven workflows, agents, and integrations
- Worked with cloud environments including AWS and Google Cloud (GCP) for test execution, integrations, and CI/CD
- Collaborated closely with R&D, DevOps, and Product to troubleshoot issues and embed quality early in development
- Reviewed test deliverables, executions, defects, and quality processes using JIRA and XRAY
- Built automation infrastructures across multiple technologies and supported end-to-end delivery
- Led Agile automation initiatives while remaining actively involved in implementation and debugging

Automation Developer | Elbit Systems

2021 – 2022

- Developed automation infrastructure for UAV systems
- Implemented tests using Node.js and C# (NUnit)

Software Developer | Discount Bank

2018– 2020

- COBOL & Java Developer-
- Automation Developer (UFT, Selenium, JavaScript, C#)

Software & Automation Developer | A.R.M.L

2015– 2018

- COBOL
- Automation Developer (UFT, Selenium, JavaScript, C#)

Technical Skills

Languages: C#, JavaScript, TypeScript, Node.js, COBOL, Java

Automation: Playwright, Selenium, TestCafe, Protractor

AI: Agentic AI testing, AI-driven workflows, agents & integrations

Cloud: AWS, Google Cloud (GCP)

Databases: SQL Server, Oracle, MySQL, DB2

Practices: CI/CD, Test Automation Architecture, Agile, Quality Gates

Education

- Practical Software Engineering (Afeka College)
- Practical Mechanical Engineering (Kadoorie College)

Military Service

Ordnance Commander (IDF, Career Service)

Additional

Hebrew (Native), English (Fluent)

Volunteer EMT (United Hatzalah) & Israel Police
